

# PLASTIC CONVEYOR BELTS

## *Plastic corner belt*

### TOP-Characteristics

- Flexible
- Wide range of carrier types available
- Reliable
- Approved for use in food processing

Our plastic corner belts allow for flexible changes in direction, from 35 to 180 degrees. Depending on the size, multiple individual segments are linked together to form the belt. The belts can be fitted with different carriers and guide elements depending on the application.

### APPLICATION AREAS

Almost every production and packaging phase | Spare belts for all known curve systems | Transfer of small products

### MATERIALS

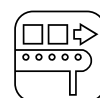

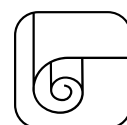

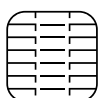

PVC | Polyurethane | Silicone

### DIMENSIONS

Widths of up to 4000 mm

### SPECIAL VERSIONS

As a right or left-handed curve | Made from various materials | Punched or with springs, carrier pulleys, elastic strips or loops
