

Separating belt

TOP-Characteristics

- Approved for use in food processing
- Outstanding non-stick properties
- Suitable for very small products
- Extremely gentle on products

Our high-quality separating belts are capable of transporting as many rows of products as the user needs. The distance between the rows is changed by transverse movement of the separating belt with a special link chain. Another advantage of our separating belts is that no refitting is necessary when changing products.

APPLICATION AREAS

Separating or converging products in the production or packaging process

MATERIALS

Transverse elastic fabric with silicone coating

DIMENSIONS

Max. dimensions: L = approx. 8000 mm | W = approx. 1500 mm | Separating range: 30 %

MIN. TEMPERATURE

-10° C

MAX. TEMPERATURE

+50° C

SPEEDS

Max. belt speed: 25 m/min

ACCESSORIES

MÄRTENS Cleaner
