

PLASTIC CONVEYOR BELTS

Transparent belt

TOP-Characteristics

- Versatile
- Ideal for perfectly positioned conveying
- Surface can be shaped to meet customer needs
- Fluoroscopic

With their combination of transparent silicone, fluoroscopic fabric and nubby surface, our fluoroscopic belts are perfect for use in pick-and-place robot packaging machines. Rounded nubs on the carrying side keep products exactly in position. Customer-specific surface structures can also be incorporated, in coordination with our application consultants.

APPLICATION AREAS

Inclined conveying | Precisely positioned conveying in the packaging industry

MATERIALS

Fluoroscopic-capable fabric with transparent silicone coating

DIMENSIONS

Max. width: 600 mm. | Total thickness: 3.5 mm +/-0.5 mm. | Pitch grid on carrying side: 9 x 9 mm. | Transfer diameter: 30 mm

MIN. TEMPERATURE

-40° C

MAX. TEMPERATURE

+90° C

EQUIPMENT

Nubbed carrying side

SPECIAL VERSIONS

With antistatic threads | Without antistatic threads
